The Lean Muscle Power of Time.

MRI MICELLAR CASEIN Z6 is an advanced, anti-catabolic protein designed to help preserve your gains and feed *extended* recovery potential. When developing this dynamic formula, we demanded nothing short of pure micellar casein. This undenatured form of casein yields a premium protein that delivers all of the naturally occurring casein proteins in milk (alpha, beta and kappa caseins).

Due to its pH sensitivity, casein forms a gel in the digestive tract, a feature that may provide up to *7 hours of sustained amino acid delivery*. Relative to duration of amino acid dispersion, you could say that micellar casein is "sustained fuel". This serves to support prolonged lean muscle preservation – an ideal characteristic for between-meal, muscle-fueling satisfaction and PM nutrition.

MRI MICELLAR CASEIN Z6 is powered with added Zinc and Vitamin B6, two nutrients that may enhance the body's recovery and growth potential. Zinc may support the anabolic hormones testosterone and IGF-1 while Vitamin B6 helps to "unlock" nutrients from foods and supports healthy serotonin levels, the neurotransmitter that controls mood and sleep patterns. These features further promote the incredible PM power of MICELLAR CASEIN Z6.

*= Based on the comparative research of Casein protein vs whey protein isolate dissolution inside the body. This product does not contain any modifications for the absorptive profile.
