Purely Probiotics

Founded in 1979, UAS LifeSciences has delivered the highest quality,

science-backed probiotics to health conscious consumers for more than thirty years. Today, UAS LifeSciences remains dedicated to producing only probiotics and is fully integrated to include formulation, testing, blending, packaging and shipping at our state-of-the-art manufacturing facility specifically designed to meet the rigorous requirements for the highest quality probiotics.

Our staff includes some of the most experienced scientists in the industry and we regularly participate in clinical studies. Probiotics are not just another product for us, it is all we do, it is all we've ever done. UAS LifeSciences is, and always will be, PURELY PROBIOTICS.

The DDS-1 Difference

Lactobacillus acidophilus DDS[®]1, the trademarked superstrain of UAS LifeSciences, has been the subject of numerous studies on probiotic stability, intestinal compatibility and health benefits. This strain is a core component of all Multi-Flora formulations. When combined with other well-tested probiotic strains, the result is a formula that is perfectly designed to maximize the benefits for each individual.

Strain Selection

Not all probiotic strains are created equal. Multi-Flora is

formulated with exceptionally resilient, scientifically-validated strains like *Lactobacillus acidophilus* DDS[®]1. When it comes to probiotics, it's not about the number of strains, it's about selecting the right strains in the first place.

Naturally Acid & Bile Resistant

Compatibility with gut microbes is important for probiotics. Multi-Flora uses tested probiotic strains that thrive in the gut and are non-GMO, non-dairy, gluten free, soy free, corn free, preservative free and vegan. Live cultures that can naturally withstand stomach acid and bile without the need for chemical coatings are an integral part of all blends.

Perfecting Probiotics

Probiotics must be alive to provide benefits. A combination of science

and art is needed to select and manufacture probiotics that remain viable throughout processing and distribution. 30 years of experience has resulted in manufacturing expertise that gives you the top-quality products you can trust.
