Clinically Documented Strains

Jarrow-Dophilus® EPS is a shelf-stable, multi-strain probiotic formulated with clinically documented strains.

Jarrow-Dophilus® EPS helps support the health of the entire intestinal tract with a mixture of eight probiotic species from six different genera: *Lactobacillus*, *Bifidobacterium*, *Lactcaseibacillus*, *Lactiplantibacillus*, *Lactococcus*, and *Pediococcus*.* Each strain has been clinically validated by scientific research and assigned a strain designation (e.g., R0011) that links to the positive influence on intestinal and immune health.*

†Updates based on official taxonomy reclassification.

Enhanced Probiotic System™

Jarrow-Dophilus® EPS is an **Enhanced Probiotic System™** formula due to its proprietary Enteroguard® coating, blister packing defense against air and moisture, and use of strains with excellent stability at room temperature. This ensures a maximum number of probiotic strains are delivered to the intestinal tract, where they can fully exert their benefits.*
