

SUGGESTED USAGE: As a dietary supplement, take 1 capsule 1 to 3 times daily. Dosage may be increased, under the supervision of your healthcare practitioner.

HOW IT WORKS: N-Acetyl-Cysteine (NAC) is a stable form of the non-essential amino acid L-Cysteine. Cysteine is a sulfur-containing amino acid that acts as a stabilizer for the formation of protein structures.* Although NAC possesses its own free radical scavenging activity, its primary function *in vivo* is to supply Cysteine necessary for glutathione synthesis and replenishment.* This unique formula also contains Molybdenum, an essential trace element that functions as a cofactor in many biochemical reactions, and Selenium, another trace mineral that supports glutathione production.*

CAUTIONS/INTERACTIONS: NAC may interact with certain pharmaceutical medications including ACE inhibitors and angina medications such as nitroglycerin and isosorbide. NAC may also interact with activated charcoal. For more information on this product go to www.protocolforlife.com/P0085

This bottle contains an Ageless® oxygen absorbing packet to ensure freshness. Do not eat packet.

Store in a cool, dry place after opening. Please Recycle.
