

Flexezy®-GC is a high quality, sustained-release joint and connective tissue formula. Each caplet is pharmaceutically manufactured to slowly release glucosamine and chondroitin sulfate over a 12 hour period. The phased control technology system ensures that the body receives a continuous supply of these important health-enhancing ingredients.*

DIRECTIONS: Take two caplets in the morning and two caplets in the evening until improvements in joint function and health are observed. Thereafter, you may continue the above dosage or decrease to one caplet in the morning and one in the evening. Caplets may be taken before meals or with meals, as you prefer.

CAUTION: Consult your physician prior to using this product if you are pregnant, nursing or have any pre-existing conditions. For adults only.
