*SAM-e (S-adenosylmethionine) was discovered in Italy in 1952 and has been used in Europe for years. SAM-e helps promote a positive mood and emotional well-being.**

A Note About Our Enteric Coating: The enteric coating helps the breakdown of SAM-e occur in the small intestine. In addition, the enteric coating is designed to protect SAM-e from moisture and serve as a protective barrier so that SAM-e can be absorbed where it can provide you with the greatest benefits.**

SUPER STRENGTH

SAM-e
400mg | Supported
by Research

Supports:

- ♦ Emotional Well-Being*
- ♦ Joint Health*
- ♦ Liver Function*

SAM-e is a revolutionary supplement. Whether you're a first-time SAM-e user, or have been a fan for years, you probably have some questions. Please see the enclosed package insert for more information.

The body makes SAM-e from the amino acid methionine. However, you may not be able to obtain sufficient methionine levels simply by ingesting food. In addition, because of age or other factors, levels of SAM-e can fluctuate or decline. Supplementation with SAM-e is the easiest way to increase intake.

This remarkable supplement can be used for:

- Emotional Well-Being*
- Joint Health*
- Liver Function*
