

Licorice (*Glycyrrhiza glabra*) is a botanical member of the pea family that has been traditionally used for centuries in the Eastern world. Licorice GI is made with DGL (Deglycyrrhized Licorice Extract), a special extract that gives it distinct characteristics. Licorice DGL is a popular supplement that is often taken after meals.

Directions: For adults, chew one (1) tablet, three times per day, within 20 minutes of a meal or before bedtime or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.
