

PRODUCT BENEFITS: Lutein is one of a few carotenoids selectively accumulated in the central area of the retina called the macula. The macula is responsible for supporting the health of the eye's photoreceptor cell layer. Lutein is considered a dietary xanthophyll that helps support visual health.*

Directions: For adults, take one (1) softgel daily, preferably with a meal or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.
