GASPARI
NUTRITION

Gaspari finally answers the call for an effective **fat burner** that, not only incinerates body fat, but also covers three other key areas to create the ultimate explosive fat burning and energy experience. First and foremost, I wanted to make a true thermogenic that had every proven ingredient to liberate and incinerate body fat. Then, to fuel your fat burning workouts, my fat burner also had to give you smooth energy with natural stimulants. Not the edgy anxiety that makes you feel like you're crawling out of your skin. Next I wanted to make sure I added ingredients that help with mental focus to help you concentrate in the gym. And finally, because stimulants and thermogenics can increase cortisol (which is catabolic), I wanted to include proven ingredients that support the adrenal glands to help keep cortisol levels in check. New **DTN8™** accomplishes all that and more. With the most powerful array of synergistic fat burning and energy components available today, **DTN8™** is the ultimate fat destroyer you've been waiting for.†

Richard L. Gasp
