Dr. Paul Krawitz, M.D., F.A.A.O., is passionate about eye health. With over 25 years of experience, he is one of the most professionally recognized eye surgeons in the New York area. As a practicing ophthalmic surgeon, lecturer and scholar, Dr. Krawitz is an expert in eye disease and age-related vision issues.

Fascinated by the role nutrients play in overall vision health, Dr. Krawitz began to pore over peer-reviewed research and top medical journals to be able to counsel his patients about supplements they could take to support healthy vision for a lifetime.

Unimpressed with most commercial supplements, Dr. Krawitz was driven to develop his own formulas, backed by science and derived from the highest quality ingredients and natural sources to ensure their potency and bioavailability. The choice of doctors, hospitals and patients seeking quality nutraceuticals for ocular health for over a decade, Dr. Krawitz' formulas are now available to consumers.

Macular Degeneration is a leading cause of vision loss in the United States. It destroys the delicate cells in the central part of the retina known as the macula, which is the part of the eye that provides the central vision that we need for reading and seeing details. While there is no cure for Macular Degeneration, the landmark Age Related Eye Disease Studies (AREDS and AREDS2) and other research has shown that high doses of certain vitamins and minerals are beneficial for macular health.*

Macular Support nourishes the macula with key nutrients*:

CAROTENOIDS FOR MACULAR PIGMENT*

Lutein and Zeaxanthin are absorbed by the macula and help increase healthy retinal pigment and visual contrast.*

ZINC FOR IMPROVED RETINAL METABOLISM*

Zinc breaks down retinal toxins, promotes protein synthesis and cellular healing, and is an important cofactor for many antioxidant enzymes.*

ANTIOXIDANTS FOR CELLULAR FUNCTION*

A complete antioxidant complex addresses free radicals to provide healthy function of microscopic retinal cells.*
