

PRODUCT BENEFITS: Glucose Metabolism Support is scientifically formulated to support proper receptor functioning necessary for nutrient metabolism.* When taken as directed, Glucose Metabolism Support supports the metabolism of proteins in addition to the metabolism of glucose.*

Glucose Metabolism Support also contains high-potency Chromium Picolinate. One small study suggests that Chromium Picolinate may reduce the risk of insulin resistance, and therefore may reduce the risk of type 2 diabetes. FDA concludes, however, that the existence of a relationship between Chromium Picolinate and either insulin resistance or type 2 diabetes is highly uncertain.

Directions: For adults, take two (2) tablets daily, preferably with a meal or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.

WARNING: Not intended for use by pregnant or nursing women. If you are taking any medications or have any medical condition, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur. Not intended for use by persons under the age of 18.
