

PRODUCT BENEFITS: Ubiquinol is the most common form of Co Q-10 in vivo, and accounts for 80% of the Ubiquinol-Ubiquinone pool in plasma, liver and intestine.* Regular Co Q-10 supplements must be converted in the body to Ubiquinol to provide antioxidant protection.* By supplementing with Ubiquinol, you are providing your body with an active form that is ready to fight free radicals.*

Statin medications can reduce Co Q-10 levels in the body. Co Q-10 can replenish what statin medications may deplete.*
Note: Co Q-10 is not intended to serve as a replacement for Statin therapy, nor should you discontinue taking any prescribed medications while supplementing with Co Q-10.

Directions: For adults, take one (1) softgel three times daily, preferably with meals or follow the advice of your health care professional. As a reminder, discuss the supplements and medications you take with your health care providers.
