

PRODUCT BENEFITS: Ubiquinol is the most common form of CoQ-10 in vivo and accounts for approximately 80% of the Ubiquinol-Ubiquinone pool in plasma, liver and intestine.* Regular CoQ-10 supplements must be converted in the body to Ubiquinol to provide antioxidant support.* By supplementing with Ubiquinol, you are providing your body with an active form that is ready to fight free radicals.*

Statin medications can reduce CoQ-10 levels in the body. CoQ-10 can replenish what statin medications may deplete. Note: CoQ-10 is not intended to serve as a replacement for Statin therapy, nor should you discontinue taking any prescribed medications while supplementing with CoQ-10.
