Andrew Lessman's SPICE of LIFE is more than a potent Garlic product. It is an all-natural combination of standardized extracts and concentrates from important flavorful herbs and spices that have been used for centuries throughout the world. It is their uniquely pungent flavor and equally potent chemical properties that have made these spices so valuable throughout the ages, and like many traditional remedies, recent scientific research has shown that these ingredients also deliver extremely powerful anti-oxidant benefits. **Spice of Life** delivers seven of the most important and well-researched herbs and spices, providing a broad range of powerful anti-oxidant and health benefits. **Spice of Life** contains high levels of our special Garlic concentrate to deliver the myriad of wonderful health and anti-oxidant benefits associated with that staple of the healthy Mediterranean diet. The formula also includes our Onion concentrate, as a perfect partner to Garlic, traditionally known for its support of the cardiovascular system and the body's normal flora, as well as its anti-oxidant benefits. In addition, **Spice of Life** contains a standardized extract of Turmeric, containing powerful anti-oxidant compounds traditionally utilized throughout India and Asia for a variety of benefits, including joint and digestive support. Finally, **Spice of Life** provides the powerful anti-oxidant benefits of standardized extracts of Oregano, Rosemary, Sage and Thyme. These are not mere spices, but special extracts designed to deliver high concentrations of anti-oxidants that target and neutralize a broad range of damaging free radicals that could otherwise cause oxidation within the body. Experts view many of these spices as "pound for pound" some of the most concentrated sources of anti-oxidants in the food we eat. **Spice of Life** takes a Garlic formula to the next level, delivering standardized extracts of the spices that for centuries were highly valued and today are merely taken for granted. Rediscover the power of these wonderful, overlooked sources of powerful anti-oxidants and you will discover the **Spice of Life!**
