

TriEnza® Chewable aids in the digestion of food proteins (including gluten, casein and soy), carbohydrates, sugars (including lactose), fats and polyphenols. TriEnza includes DPP IV (dipeptidyl peptidase 4) enzyme activity which, when combined with other proteases, aids in the breakdown of casomorphin (from casein) and gluteomorphin (from gluten).†

Suggested Use: Four (4) tablets at the beginning of each meal. Fewer tablets may be taken for smaller meals. Two (2) TriEnza Chewables are equivalent to one (1) TriEnza in capsule form. Use care not to inhale enzyme powder. TriEnza may be taken with other Houston Enzymes products.

TriEnza was developed by
Dr. Devin Houston, PhD
Enzyme Biochemist

Do not use if tamper-proof seal is broken. Keep container closed and store at room temperature or in freezer, but do not place in refrigerator due to humid conditions.
