Essentials for Performance

HydroBCAA® + Essentials is formulated with 150mg of Electrolytes and 10g of EAAs, 7g of which are BCAAs in a 2:1:1 ratio for optimal recovery and muscular development while rehydrating your body. ¹

Essential Amino Acids (EAAs)

Essential Amino Acids are essential because the body is unable to produce them on its own and must be consumed. EAAs are critical for cellular energy & repair and muscle preservation. HydroBCAA® + Essentials includes Essential Amino Acids and Branched Chain Amino Acids to maximize muscle protein synthesis. ¹

Branched Chain Amino Acids (BCAAs)

Branched Chain Amino Acids (L-Leucine, L-Isoleucine & L-Valine) are the most critical of the essential amino acids and necessary to stimulate protein synthesis, prevent muscle breakdown, and maintain critical glycogen stores. HydroBCAA® + Essentials is built to deliver 7g of BCAAs to the body fast and effectively. ¹
