

SUPERIOR QUALITY

Colostrum-LD supports a balanced healthy immune system and the healthy integrity of the stomach and intestinal lining. Colostrum is the first food of life and is collected from the first milking of Grade A pasture-raised dairy cows that are not augmented with rBST, and antibiotic-free. Colostrum-LD is coated with bio-identical liposomal lipids extracted from milk and sunflower oils to help protect the colostrum from the digestion process for optimal absorption. Bovine colostrum is full of naturally occurring immunoglobulins, growth factors, lactoferrin and amino acids to help boost a healthy immune function.*
