

D-Phenylalanine, or DLPA, is a 50/50 mixture of the D- and L-forms of the amino acid phenylalanine (phenylalanine is one of the few amino acids that can be utilized in its D form). Researchers believe that D-phenylalanine (DPA) inhibits the action of an enzyme that breaks down endorphins and enkephalins. These are proteins that bind to opioid receptor sites in the brain, thereby influencing the perception of discomfort. By obstructing the action of this enzyme, DPA may extend the life of endorphins and enkephalins and their positive influence on comfort levels. L-Phenylalanine is the precursor to two neurotransmitters that help support an alert state.*

DIETARY SUPPLEMENT
DLPA
DL-PHENYLALANINE
SUPPORTS AN ALERT STATE*
750 MG • 30 TABLETS

Supplement Facts
Serving Size 1 Tablet

	Amount Per Serving	%DV
Calcium	54 mg	5%
D-Phenylalanine	750 mg	†

†Daily Value not established.

Other ingredients: dibasic calcium phosphate, stearic acid, sorbitol, magnesium stearate, colloidal silicon dioxide, and modified cellulose gum.

Suggested Use: 1 to 3 tablets daily.

WARNING: Contains phenylalanine. Not to be used by phenylketonurics, women who are pregnant, may become pregnant, or breastfeeding, or with antidepressant drugs containing MAO or SSR inhibitors. If you have chronic high blood pressure, take after meals and/or consult your health care professional.

Do not use if either tamper-evident seal is broken or missing. Keep out of the reach of children.
