HYBRID RATIO ISOLATE Ion-Filtration Technology

ISONatural™ employs a unique protein extraction technology called HRI. A hybrid of two isolate purification technologies incorporated at a specific ratio to produce a truly superior ultra-pure Whey Protein Isolate. Cutting-Edge Hybrid-Ratio Ion-Filtration (HRI) Technology allows **ISONatural™** to retain an exceptionally high protein yield while maintaining bioactive whey fractions (*chart on right*). **ISONatural™** contains absolutely NO Whey Concentrate. Concentrates have higher levels of fat and sugars with a lower percentage of protein and lower bioavailability than Isolates.
