Enzymedica's Berberine is standardized for maximum potency and is sustainably sourced from Barberry.

BENEFITS OF BERBERINE

Used in traditional medicine for centuries, Berberine is renowned as a safe and effective herbal remedy for supporting both blood sugar and cholesterol levels already within a normal range, healthy metabolism and microbiome balance.*

IMPORTANCE OF SOURCE

Berberine can be sourced from many plants, including Barberry and Goldenseal. Unfortunately, Goldenseal is an "at risk" plant due to overharvesting in the wild and its use is strongly discouraged by plant conservationists.

Our berberine is 100% derived from the Barberry plant, which grows abundantly, is naturally sustainable and rich in valuable phytochemicals.

QUALITY - STANDARDIZED

Enzymedica's berberine is standardized to 95%. This means you are getting a consistent, potent dose of active berberine; the most beneficial compound in the barberry plant. Our berberine is tested for quality and purity both before and after manufacturing. Other products that are not standardized cannot guarantee purity and consistency.
