Many people have difficulty digesting gluten and casein proteins commonly found in carbohydrates, resulting in discomforts like occasional gas and bloating. Even those on gluten-free/casein-free diets may experience difficulties due to cross-contamination from offending foods.

GlutenEase™ contains Protease Thera-blend™ (G1) along with DPP-IV activity for enhanced digestion of foods containing gluten and casein.* Starch-digesting amylase enzymes assist in the digestion of the carbohydrate portion of grains, such as wheat, which contain gluten.

Recommended Use: 1 capsule with each meal containing gluten or casein. More may be taken as needed.

This product is not intended to replace a gluten-free diet for individuals with Celiac Disease.

Thera-blend™ is an exclusive process that combines multiple strains of enzymes that work in various pH levels. Thera-blend enzymes have been shown to be three times stronger and work more than six times faster than leading digestive supplements.* For more information, visit www.enzymedica.com.
