Acerola Juice • Strawberry • Aronia

DIETARY SUPPLEMENT
Net Wt. 5.8oz 165g

Know Your Reds

After our release of the highly-rated **Greens & Superfoods**, our customers demanded we follow up with a "reds" product of equal quality and innovation. We've taken a unique approach in delivering not just *reds*, but the powerful *blues and purples* as well. We didn't only use common fruits, but also many exotic fruits that most people will have a hard time incorporating into their everyday-diet. Reds and blues typically get their color from a class of antioxidants known as anthocyanins, but limiting your supplement to just red-colored fruits or vegetables only gives you a fraction of the different anthocyanins that exist. By incorporating deep blues and purples in addition to reds, our **Exotic Reds & Blues** covers a wide spectrum of micronutrients.

Supplement Facts

Serving Size 1 Scoop (5.5 g)
Servings Per Container: 30

	Amount Per Serving	%DV

Concentrated Superfoods

What truly makes superfoods "super" is their rich makeup of different micronutrients. Micronutrients include things like common vitamins and minerals, but more-so specific antioxidants and cofactors. In order to provide a wide variety of micronutrients in every serving, we chose specific extracts of fruits. This blend uses specific extracts and concentrates in order to get more of the key micronutrients in a small serving size. Think of it like drinking an espresso over traditional dripped coffee. A small shot of espresso delivers as much caffeine as 2 cups of regular coffee. We bring the same concept here, focused on micronutrients for antioxidant support, coming from key fruits complimenting the total **Exotic Reds & Blues** formula.†

DIRECTIONS: Mix 1 scoop with 6-8oz water or flavored beverage. Product may clump over time and is normal for freeze-dried fruit powders. Break apart inside the bag before scooping. Mixes great with our **Greens & Superfoods**! Settling after mixing is normal.
