

Research suggests that vitamin D may be your single most important supplemental nutrient. Required for optimal calcium absorption, vitamin D promotes strong bones and is vital support for a healthy immune system.\*

Vitamin D is obtained from the diet or from sun exposure. However, vitamin D is not abundant in foods and people are increasingly avoiding the sun. Supplementation is necessary to ensure healthy levels of this key nutrient.\*

Free from artificial colors and artificial preservatives. Free from the allergens milk, eggs, fish, crustacean shellfish, tree nuts, peanuts and wheat.

 **VEGETARIAN**  **GLUTEN FREE**

**KEEP TIGHTLY CLOSED IN A COOL, DRY PLACE.**
