

These are not claims by science – it's simply what you can use. There are, however, time-tested and critical components to growth, such as excellent post-workout nutrition, timed properly, in an effective delivery system. And to that end, there is the all new Core POST.

Our new matrix takes the premium behind the original Core PWO combining fast acting protein and carbohydrate sources – and improves on that idea in a massive way. We have the classic ingredients of cold-processed microfiltered whey protein isolate, pure dextrose, and Cluster Dextrin, a branched-chain response carb source with reduced blood sugar. Core POST also includes patented free form L-leucine and Velositol[®] to further enhance protein synthesis. In addition to these, we have added Vitacherry[®] to support optimal recovery, as well as Bioperine[®] to enhance the efficiency of the ingredients.*

Together, our changes and these new ingredients have made the best post-workout recovery matrix ever before!

WARNING: Consuming this product can expose you to chemicals including lead, which is known to the State of California to cause cancer. For more information, go to www.P65Warnings.ca.gov.

WARNING: This product is only intended for use in healthy adults 18 years of age or older. Pregnant or nursing women should not use this product. Consult your healthcare provider before using this product, especially if you are taking any prescription over the counter medication, dietary supplement product, or if you have any pre-existing medical condition including but not limited to: high or low blood pressure, chestnut arrhythmia, stroke, heart, liver, kidney or thyroid disease, seizure disorder, psychosis, diabetes, difficulty urinating due to prostate enlargement or if you are taking a MAO inhibitor, Monoamine Oxidase Inhibitor or any other medication. Discontinue use and consult your health care professional if you experience adverse reaction to this product. Do not exceed recommended serving. Do not use if safety seal is broken or missing. Keep out of reach of children.

DIRECTIONS: Add 2 scoops to 8-16 ounces of cold water according to desired thickness and flavor and drink or stir and drink. Consume immediately after training.
