

Calcium, Magnesium and Zinc are vital for the formation of strong bones and teeth. They support healthy neural, muscular, blood vessel and cardiovascular function, including heart rhythm. All three of these essential nutrients are critical for the healthy function of the brain, nervous system and muscular system. Calcium is most well-known for bone & muscle support while magnesium is prized for its calming effects and its ability to promote bowel regularity. Zinc is one of the most popular nutrients for immune defense support and also essential for healthy muscles and reproductive hormone production.*

Free from artificial colors and artificial preservatives.
