

Lysine is an essential amino acid required for building and maintaining the primary structural proteins collagen and elastin, which then form the foundations of all connective tissues such as skin, tendon and bone. Lysine is required for the production of all proteins and is a precursor to carnitine, needed for energy production and fat metabolism. In addition, lysine helps support healthy immune defenses and cardiovascular wellness.*

Free from artificial colors and artificial preservatives. Free from all of the major allergens identified in the U.S. Food Allergen Labeling and Consumer Protection Act.
