

Research suggests that vitamin D may be your single most important supplemental nutrient. Required for optimal calcium absorption, vitamin D promotes strong bones and is vital support for a healthy immune system.*

Vitamin D is obtained from the diet or from sun exposure. However, vitamin D is not abundant in foods and people are increasingly avoiding the sun. This high-potency supplementation is necessary to ensure healthy levels of this key nutrient.*

Free from artificial colors and artificial preservatives. Free from all of the major allergens identified in the U.S. Food Allergen Labeling and Consumer Protection Act.
