

Green Coffee Bean Extract Powder

Net Wt
1 lb (454 g)

Our Green Coffee Bean Extract Powder is made from organically grown ripe raw coffee beans and low temperature extracted with alcohol and water to a 50% concentration of chlorogenic acid. Chlorogenic acid is a polyphenol that is especially abundant in coffee, and may be credited for many of green bean coffee extract's beneficial effects.

Suggested Use:

Mix 1/4 teaspoon (1g) with juice or water 30 minutes before each meal.
