

Known as The Pro Creator® Many Rambod has been constructing championship-winning physiques for over 20 years while using his ground-breaking FST-7™ training system. Rambod prides himself on bringing only quality innovations to his customers around the world. The formulations within the Evogen Nutrition supplement line are a result of the success of any ultra-intense training program because of their effect on muscle growth, repair, and muscle volume.†

SHAKER: Bringing a shaker cup with you to the gym is the best way to get a powerful dose of protein immediately after your workout. Just pour in 8-8 oz of your preferred beverage and then add one rounded scoop of Evofusion into your shaker cup. Cover and shake for 25-30 seconds. †

BLENDER: Add one rounded scoop of Evofusion into a blender, filled with 8-8 oz of water, nonfat milk, or your favorite beverage. Blend for 20-30 seconds. Then add 1 of 2 ice cubes and blend for an additional 30 seconds.

SHAKE UP YOUR SHAKE: By adding fresh or frozen fruits, peanut butter, flaxseed oil, coconut and other high-energy ingredients, you can transform your shake into a delicious high-protein meal.

STACK YOUR SHAKE: You can make Evofusion an even more powerful recovery product by adding supplements like creatine, glutamine, Evogreens®, or Glycolect®.

THINK OUTSIDE THE GLASS: Evofusion can be used for more than just protein shakes. Try mixing a scoop into oatmeal, yogurt, or the milk that you pour over your morning breakfast cereal. Better yet, boost the protein content of muffins, cookies, brownies, etc. by adding a scoop or two to your baked goods recipes.

SUGGESTED USE: Consume approximately 1 gram of protein per pound of body weight per day through a combination of high protein foods and protein supplements. For even better results, consume your daily protein allotment over several small meals spread evenly throughout the day.

WARNING: This product is only intended to be consumed by healthy adults 18 years or older. Always consult with your physician before using this or any food supplement product or starting any exercise training program or diet. Do not use this product if you are pregnant or nursing. Discontinue use and immediately contact your healthcare professional if you experience any adverse reaction to this product. Follow label instructions and do not exceed recommendations for suggested use. Do not use if safety seal is broken or missing. **KEEP OUT OF REACH OF CHILDREN.**

NOTICE: USE THIS PRODUCT AS A FOOD SUPPLEMENT ONLY. DO NOT USE FOR WEIGHT REDUCTION.

WARNING: CONSUMING THIS PRODUCT CAN EXPOSE YOU TO CHEMICALS INCLUDING LEAD, WHICH IS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM. FOR MORE INFORMATION GO TO WWW.P65WARNINGS.CA.GOV/FOOD

THE EVOFUSION® DIFFERENCE

EVOFUSION contains a potent blend of three proteins in equal ratios to ensure you are getting appropriate fast, medium, and slow digesting protein sources. With each source in an appropriate ratio, Evofusion helps ensure steady state amino acid absorption over a longer time period than single source proteins making it ideal for anytime of the day, in meal replacements, etc.

1 To contribute 8g of actual protein, 8.3g of actual single whey isolate is used to contribute ultra-fast acting protein to this blend.

2 To contribute 8g of actual protein, 10.6g of actual pure single source whey concentrate is used to contribute medium-fast acting protein to this blend.

3 To contribute 8g of actual protein, 13g of actual pure single source micellar casein is used to contribute slow acting protein to this blend.
