Feel Younger, Longer

UC Berkeley conducted one of the largest studies of long-term supplementation and found that Shaklee users had:†

- 11% lower cholesterol ratios, a key marker for cardiovascular health
- 33% lower levels of triglycerides, a critical biomarker for heart health
- 36% lower levels of homocysteine, an indicator of brain and cognitive health
- 59% lower levels of C-reactive protein, a key biomarker for long-term biological stress
- Substantially higher levels of nutrients in the blood

In a preliminary clinical study across the adult-age range, the rate of telomere shortening in Shaklee users was 40% lower than in a healthy control group.
