

Nattokinase is an enzyme derived from "natto," a traditional fermented soy food popular in Japan. During the natto production process, non-GMO soybeans are boiled and fermented with friendly *Bacillus subtilis* bacteria producing nattokinase. **Doctor's Best Nattokinase** contains nattokinase enzyme with Vitamin K2 removed. Nattokinase has been shown to support a healthy circulatory system by helping to maintain normal fibrinogen levels in blood.*

Helps support a healthy circulatory system*
