

Pregnenolone is often called "The Master Hormone" because it can be converted into many other steroidal hormones. Both Pregnenolone and DHEA are naturally produced in the body by the adrenal glands. Because production levels slow with age, supplementation may help to support more youthful levels.\*

Emerald Labs is family owned and operated since our beginnings in 1996. We are committed to providing your family with additive-free formulas and superior nutrient forms in therapeutic amounts.\*
