

CATALO Children's Vegetarian DHA Formula

DHA is one of the major structural components of the brain and eyes; studies show that consuming sufficient DHA allows better brain & eye development, and improves children's vision acuity, learning and thinking abilities for a brighter future.¹

Ocean fishes are known for their rich DHA content because of their diet – micro-algae; therefore, CATALO Children's Vegetarian DHA Formula uses *life'sDHA*™ which is a highly purified algae DHA* recognized by FDA as safe food for children. It has no ocean-borne pollutants and fishy taste. The DHA is being used in most U.S infant formulas. In an easily dissolved powdery form, CATALO Children's Vegetarian DHA Formula helps you to develop the full potential of your child.

* Contains 300mg DHA per serving.
