INNOVATORS OF ADVANCED SPORTS BIOSCIENCE

MESOMORPH™-An individual with a robust, muscular body build caused by the predominance of structures developed from the embryonic mesodermal layer. Release the MESOMORPH™ within!

Why is MESOMORPH™ so effective?

MESOMORPH™ is the first to deliver FULL CLINICAL DOSES of it's key active ingredients, not half amounts typically seen in these types of formulas. MESOMORPH™ also contains clinical amounts of the super supplement BETA ALANINE not seen in other powders and CREATINOL-O-PHOSPHATE for maximum performance!

Assess tolerance: MESOMORPH™ is a HIGH POTENCY formula that may require a gradual dose increase for some individuals. If you are experienced with beta alanine go right to 1 full scoop (MESOMORPH™ contains 4000 mg per serving). If you are not experienced with beta alanine start with 1/2 scoop MESOMORPH™. If no tingling or discomfort occurs take 1 full scoop on next dose and thereafter. If tingling does occur continue 1/2 scoop for 7-10 days then increase to 1 scoop (or as soon as possible). That warm tingle sensation is just MESOMORPH™ at work. Although it can be strong in some, it is not harmful in any way and will subside once body adjusts.

Suggested use: After tolerance has been determined 40 min prior to workout mix one scoop of MESOMORPH™ with 8-10 oz of water, stir adequately and consume immediately on an empty stomach. On non-workout days consume 1/2 scoop MESOMORPH™ mixed in water on an empty stomach.

Although you will feel MESOMORPH™ from day 1. Best results begin to occur at day 15 and continue to improve up to day 60. After 8-10 weeks it is recommended that you discontinue use of MESOMORPH™ and take at least 8-10 weeks off before resuming use. During this "off period" you may take a non-creatine product such as PLASMAGEN NITRATE™ to experience continued progress.

WARNING: As with any supplement check with your physician prior to use. Do not use this product if you have any current or previous medical condition of any kind. Such conditions may include but are not limited to high or low blood pressure, stroke, arrhythmias or palpitations. Any heart, thyroid, or liver condition. Seizures, anxiety or depression, prostate enlargement or inflammation. Do not use if you are nursing or pregnant. Do not use if you are taking an MAOI. If any adverse symptoms occur discontinue use immediately and consult a physician. Keep out of reach of children. DO NOT take for more than 8-10 weeks without an 8-10 week off period.
