CATALO Extra Lutein Formula contains natural ingredient TMFloraGLO Marigold Extract (containing Lutein and Zeaxanthin), which is the ideal supplement for the macula – the central area of the retina. Lutein acts as a blue light filter, to help filter out photochemical damage caused by short-wavelength visible light. Additionally, Lutein's powerful anti-oxidative properties may offer protection against light-induced oxidative damage by quenching reactive oxygen species. Studies showed that supplementation of Lutein is beneficial for visual acuity and quality of vision.*

Main Functions:

- Promote overall healthy vision
- Filter harmful short-wavelengths of visible light (i.e. blue light)
- Stabilize membrane integrity
- Powerful antioxidant

Suitable for: People who suffer from blurry vision, having black dots or distorted visual image, presbyopia, uncomfortable under strong light, vision acuity and contrast sensitivity decline with age, people who have done eye surgery, readers, spending long hours on computer or TV
