CATALO Extra Astaxanthin Extract is made from unpolluted freshwater microalgae to protect cells from oxidative damages. Being the most powerful antioxidant agent among anti-aging molecules,¹ Astaxanthin fights against free radicals both in the inner and outer sides of cell membranes, whereas most antioxidants work only in either one of the sides. Astaxanthin is clinically proven to improve blood flow by removing wastes and increasing the flexibility of blood vessels.² It is also clinically proven to reduce age spot areas and skin wrinkles visibly³ while improving skin elasticity and moisture.⁴ Astaxanthin is an excellent anti-aging and cardiovascular health supplement you can trust.

Main Functions:

- Superb antioxidant for supporting cardiovascular health
- Superior natural anti-aging regimen to promote healthy body cells
- Maintain youthful appearance and prevent premature signs of aging

Suitable for: Concerned about cardiovascular health, desire for young and beautiful skin, frequent computer users, always feel tired or lack of energy
