

CATALO

NATURAL CALCIUM FORMULA

CATALO Natural Calcium Formula contains algae calcium and natural Caribbean coral calcium harvested from the unpolluted marine coral fossils. It is highly absorbable because of its natural ability to become ionic upon contact with moisture. CATALO Natural Calcium Formula also helps to reduce the risk of bone loss and improves overall bone density. It has good bioavailability that can be easily absorbed by our body. Encapsulated in a vegetarian capsule which is suitable for everyone.

With clinically proven efficacy to enhance bone health,¹ algae calcium helps to relieve joint pain and promote joint mobility.² Its beehive-like structure can further enhance bone development as it will be immediately dissolved in the digestive system and quickly absorbed.

Natural Caribbean coral calcium contains natural minerals and trace elements which are the key ingredients to replenish nutrients for maintaining healthy bones and balance body's pH level. Its high bioavailability encourages higher absorption by the body.

Main Functions:

- Strengthen bone tissue and structure
- Improve bone density and tenacity
- Reduce bone loss
- Relieve joint pain and promote mobility

Suitable for: Children 6 years old or above, teenagers, adults, elderly, pregnant and lactating women, concerned about bone health

攝取鈣質健康小貼士

- 1 攝取天然鈣質: 容易吸收, 並且不會為腎臟帶來沉重負擔
- 2 每日以少量服用, 避免一次過大量服用: 由於身體每次只能吸收少量鈣質, 因此每日分開數次服用, 更能提升吸收率
- 3 進餐時一同服用: 由於進食會刺激胃酸分泌, 有助鈣質吸收
