

Suggested Usage: Take 1-2 capsules 1 to 2 times daily as needed.

Acetyl-L-Carnitine (ALC) is a modified amino acid that supports cellular energy production by assisting in the transport of fat into the mitochondria where it is converted into ATP (cellular fuel).* ALC is a highly bioavailable form of carnitine that can cross the blood-brain barrier, where it helps to neutralize free radicals, supports mitochondrial function and helps to maintain normal neurotransmitter activity.* Clinical studies suggest that ALC helps to maintain optimal neurological health.*
