Serving Size: 1 Packet
Servings Per Container: 60

	1 Alcanas® CR Tablet		2 & 6 max® CR Tablet		3 Repasent® Plus Capsule	
	Amount Per Serving	%DV	Amount Per Serving	%DV	Amount Per Serving	%DV
total	400 mg	1,000%				
1. Arginine alpha-ketoglutarate			1.00 g	100%		
2. Arginine (L-Arginine)	600 mg	100%			200 mg	100%
3. Arginine (as arginine dihydrochloride) (Arginine dihydrochloride)			150 mg	100%	25 mg	100%
4. Glycylglycyl-L-Arginine (Glycylglycyl-L-Arginine)					62.5 mg	100%

Other Ingredients for ALKALAX CR: Hydroxypropyl methyl cellulose, microcrystalline cellulose, hydroxypropyl cellulose, disodium phosphate, magnesium stearate, silica, and coating (hydroxypropyl methyl cellulose and medium-chain triglyceride).

Other Ingredients for N.5.03 ER: Hydroxypropyl methyl cellulose, stearic acid, hydroxypropyl cellulose, silica, coating (hydroxypropyl methyl cellulose and medium-chain triglyceride), and croscarmellose sodium.

Other Ingredients for Reversionix Plus: Capsule (hypromellose and water), microcrystalline cellulose, stearic acid, magnesium stearate, silica, and medium-chain triglyceride oil.

W.D. max ER Contains: Milk

Restore Your Metabolic Edge*

Metabolism is the wellspring of life. Mitochondria, representing a staggering 10% of body weight, are the cornerstone of energy production. Over time, mitochondria age.¹¹ You lose your metabolic "edge." Your appearance, feeling of well-being, and physical capabilities progressively "dull."

Sharpen your metabolism back to a razor's edge with mitochondrial biogenesis. Three scientifically formulated, safe, and effective dietary supplements—ALAnax[®] CR, N.O. max[®] ER, and Resveratin[®] Plus—seamlessly act as one entity to support the restoration of a lifetime.*

This Is How Metabolism Should Look and Feel

Metabolism is the process by which your body's cells produce energy. Most of this energy is produced in mitochondria. These cellular "powerhouses" oxidize or "burn" calories, principally from glucose (blood sugar) and fat. Metabolically active cells, such as those of the brain, heart, and muscle, may contain 100s to 1,000s of mitochondria. The more mitochondria inside your cells, the more calories your body can burn. Thus, healthy mitochondria give your metabolism a calorie-burning, energy-generating edge.

The process by which new mitochondria are produced inside your body's cells is known as mitochondrial biogenesis. In light of the many metabolic and protective roles played by mitochondria, it's no surprise that mitochondrial biogenesis is critical to delaying the effects of aging and age-associated declines in metabolism (e.g., increased body fat and decreased lean muscle tissue).^{11,12,13}

Mitochondrial biogenesis is a complicated process involving more than 1,000 genes.²¹ Caloric restriction and aerobic exercise promote mitochondrial biogenesis. However, caloric restriction and consistent aerobic exercise regimens are difficult to maintain.^{22,23} Uncomplicate your life with the **Mitochondrial Reveal Kit**. It contains ingredients that help restore your metabolic edge by activating the critical molecular “switches” that control mitochondrial biogenesis—the very same switches activated by caloric restriction and aerobic exercise.²⁴

Embark on the restoration of your life. Restore your metabolic edge with the Mitochondrial Renewal Kit. Enjoy the look and feel of great metabolism.^{1*}

§ Based on emerging experimental research.

† For optimal benefit, combine this product with a healthy diet and exercise regimen.

DIRECTIONS: Consume the contents of one packet with 8 oz. water, 30 minutes before breakfast and 30 minutes before lunch, or as directed by your healthcare professional.

Individuals with a medical condition (including diabetes or cold sores), that are taking prescription drugs, that are pregnant or lactating, or are under the age of 18 should consult their healthcare professional prior to use. Do not use if packet is damaged.

ALAMAX[®] CR is a wide-body, multifunctional antioxidant that helps to maintain healthy, well-functioning cells. ALAMAX CR is designed to neutralize free radicals. ALAMAX CR has the ability to destroy free radicals in both the water-based and lipid-based portion of cells, making it the ideal whole-body antioxidant. In addition, ALAMAX CR helps the body synthesize glutathione, the body's own master detoxifier. ALAMAX CR also "recharges" other important antioxidants, such as vitamins C and E, and CoQ10, giving them the ability to continue fighting free radicals for extended periods of time. In addition, biotin supports the function of alpha-lipoic acid in regulating glucose metabolism.*

N.O.max[®] ER represents an extended-release nitric oxide precursor. Scientists now refer to nitric oxide (NO) as the "foundation" of cardiovascular health. This tiny molecule is a vasodilator responsible for controlling blood flow to the entire body, which may help support healthy blood flow pressure and promote the health of the endothelium—the inside of blood vessels. With age comes diminished NO levels; that's why since 1998, when three scientists won the Nobel Prize for their discovery of NO, researchers have been working to harness its heart-healthy activity. Today, with the application of XYMOGEN's extended-release technology, that activity has been realized with **N.O.max[®] ER**. *

Resveratin™ Plus provides a complete bioflavonoid complex with resveratrol, quercetin, and pterostilbene. These three antioxidants work together synergistically. Pterostilbene, a new focus of scientific research, is methylated resveratrol, a bio-optimized form that complements resveratrol and quercetin. These compounds are being extensively studied in the areas of cardiovascular health and aging.*

Each packet contains: 1 ALAmax CR tablet, 3 N.O.max ER tablets, 1 Resveratin Plus capsule

XYMOGEN supports the initiative

XYMOGEN is committed to reducing the amount of plastics used throughout our business, particularly in the packaging of our products. With our participation in the United Nations Environment Programme Clean Seas initiative, we strive to positively decrease our environmental footprint, providing results that can ultimately:

- Help free the ocean of litter, making it safer for millions of marine animals.
- Reduce the use of non-renewable resources.
- Keep wild-caught seafood healthy and safe to eat.
- Protect maritime economies such as organic fishing, tourism, and recreation.

We are doing our part to make a world of difference. How are you making an impact?

#CleanSeas
