

BE MAGIC™

At Be Magic we are excited to bring a synergy of two unique Mother Nature gifts such as Manuka Honey MGO 500+ and Be Propolis 40% Extract for your everyday wellbeing.

New Zealand untouched wilderness provides with zillion of natural products with beneficial properties.

Propolis

Propolis is a resinous material collected by bees from bud and exudes of the plants, which is transformed in the presence of bee enzymes. In general, raw propolis is composed of 30% wax, 50% resin and vegetable balsam, 10% essential and aromatic oils, 5% pollen and other compounds.

Etymologically, the Greek word "propolis" means "pro", for of defence and "polis" means a "city", that could be translated as "defence of the hive". Bees use it to seal holes in their hives, smooth out internal walls as well as to cover carcasses of intruders who died inside the hive in order to avoid their decomposition and bees family infestation. Propolis also protects the colony from parasitic microorganisms because of its antiseptic efficacy and larvae immune supporting properties.*

Manuka Honey

Original from New Zealand the monofloral Manuka Honey with 500+ mg/kg of Methylglyoxal that we use to create our lozenges is well known for its unique properties found in the great amount in no other honey in the world.
