

In the early 1990s, EAS introduced its original brand of creatine monohydrate and thus sparked the first great revolution into the sports nutrition market. Since the release of Phosphagen, Hi-Tech has worked diligently to develop a creatine product that would represent the same quantum leap in nutritional technology and consumer value that EAS' Phosphagen did. Now, nearly twenty years after EAS launched Phosphagen, Hi-Tech Pharmaceuticals is launching a new and improved Phosphagen™!

The new Phosphagen™ optimizes the benefits of creatine supplementation because it doesn't just stop with incorporating the finest ingredients to enhance creatine availability for utilization in the phosphagen system. The new Phosphagen™ also incorporates ingredients that create a synergistic effect with creatine by enhancing creatine uptake and by delaying the onset of muscular fatigue during intense muscular contraction. This provides the creatine ingredients in Phosphagen™ with the opportunity to continue to perform longer in the phosphagen system, which extends the duration and intensity of muscular contraction to elicit a greater hypertrophic response. Thus, the bodybuilder who wisely chooses Phosphagen™ over another typical creatine product will have the extra amount of muscle fuel available to complete the one additional rep required to pull the trigger for muscles to grow.

Phosphagen™ is back to maximize the creatine endgame with renewed thinking outside the creatine box, which represents what creatine supplementation is capable of achieving in its most aggressive and comprehensive form. Phosphagen™, by Hi-Tech Pharmaceuticals... more weight...more reps...more muscle!

HI-TECH

PHOSPHAGEN™

HPLC Pure Creatine Complex

Dietary Supplement
500 grams

Supplement Facts

Serving Size: 1 heaping scoop (15 grams)

Servings Per Container: 33

Amount Per Serving	% Daily Value
Proprietary Blend with Micro-Rx™ and Extend-Rx™ Technologies:	
12.5 grams	*
Creatine HCl, Creatine Nitrate, Disodium Creatine Phosphate Tetrahydrate, Beta-alanine, CreaPhos™ Creatine Phosphate, Guanidinopropionic acid	

*Daily Value Not Established

Other Ingredients: Malic Acid, Citric Acid, Stearic Acid, Naturally Sweet™ (Erythritol, Maltitol, Maltodextrin, Xylitol, Tagatose, Sucralose), Silica, Natural and Artificial Flavoring

Suggested Use: On training days: To optimize creatine uptake and PCr deposition for enhanced muscle work performance and muscular development, take 1 scoop of Phosphagen™ with 8-10 ounces of water 20-30 minutes prior to training. On non-training days: To volumize muscle cells, speed recovery, and maximize saturation of PCr stores, take 1 scoop of Phosphagen™ with 8-10 ounces of water anytime as desired during the day.
