

Body Ecology® Histamine Reducing Probiotic is a blend of beneficial bacteria that support the DAO enzyme and help lower high levels of mast cells in the gut. The DAO enzyme is responsible for breaking down histamine in the intestines.

Recommended usage: Mix one large scoop (tad scoop) for adults – or one small scoop (smidgen scoop) for children in water, smoothie, shake or any liquid 1-2 hours before a meal, or as recommended by your healthcare professional. Refrigerate to retain highest potency. Store measuring spoons in a dry area to avoid moisture. Keep out of reach of children. Consult your physician prior to using this product if you are pregnant, nursing, taking any medication or have a medical condition. Do not use if seal is broken.
