ALOE VERA -200-

200 MG OF 200:1 ULTRA-CONCENTRATE
PLUS BARLEY GRASS AND WHEAT GRASS

360 Easy-to-Swallow Capsules

Andrew Lessman's ALOE VERA-200 provides 200 mg of our special 200:1 ultra-concentrate of pure Aloe Vera derived from the desirable inner fillet of the *Aloe Vera Barbadensis* plant. Our Aloe Vera is grown in exceptionally fertile soil and never exposed to any frost while growing or heat during the extraction process. Our Aloe Vera is so concentrated that it requires over 12 pounds of pure Aloe Vera Gel to deliver just one ounce of the special material present in this formula. Aloe Vera has a long history of use going back more than 2,000 years for the health of numerous body systems, including the skin, immune system and gastrointestinal tract. Aloe Vera continues to be an essential component in many ancient traditional remedies still in use today around the world. Used externally, the Aloe Vera plant has been relied upon traditionally for centuries to support the body's wound-healing capabilities, as well as its gentle soothing role for skin irritation, such as sunburn. It is for this reason that it is found in numerous skincare and topical products. When consumed internally, Aloe Vera's soothing properties are best observed in the stomach and gastrointestinal tract where it supports the health and integrity of gastrointestinal mucosa. Traditionally, Aloe Vera's multitude of uses have been admired for thousands of years, but today scientists can attribute its benefits to a rich array of uniquely healing substances and essential nutrients. Our **Aloe Vera-200** was specifically designed to concentrate these beneficial substances to deliver the greatest benefits as economically and conveniently as possible.

DIGEST ASSURE™

COMPLETE DIGESTION FORMULA
ALL VEGETARIAN • NO ANIMAL ENZYMES

360 Easy-to-Swallow Capsules

Andrew Lessman's DIGEST ASSURE is a mild, all-natural food supplement designed to support and enhance your body's natural digestive processes. **Digest Assure** contains a comprehensive balanced blend of enzymes, to help your body digest and benefit from the diverse and very complex foods we eat. Unlike most digestive enzyme products, which are derived from pig, ox and beef bile and enzymes, **Digest Assure** is entirely produced from all-natural vegetarian sources. Its active ingredients are balanced to help you break down the macronutrients (proteins, carbohydrates and fats) you consume into smaller molecules that can be absorbed to nourish and benefit your body. Macronutrients make up the greatest portion of your diet, and when broken down by our natural Protease, Amylase and Lipase enzymes, they can be used to provide your body with the structural components it requires, as well as fuel to produce energy. In addition to these three most important enzymes, **Digest Assure** also contains Cellulase to aid in fiber digestion, Lactase to break down dairy products, as well as natural Papain and Bromelain for additional support in converting proteins into absorbable amino acids. Many factors, including stress and aging, can make the complete digestion of the food we eat very difficult or impossible, which is why the mild, yet powerful natural enzymes in **Digest Assure** are so important to enjoying the benefits of a healthy diet.

FRIENDLY FLORA

PREBIOTIC AND PROBIOTIC COMPLEX
FOS AND LACTOBACILLUS • 5 BILLION CFU

180 Easy-to-Swallow Capsules

Andrew Lessman's FRIENDLY FLORA is a unique blend of **Prebiotics** and **Probiotics** to enhance the Friendly Flora (beneficial microorganisms) in our digestive system. Probiotic means "for life" and Probiotics have been beneficially consumed for thousands of years. It is well established that the Friendly Flora that populate our GI tract play a vital role in our overall health. This formula provides five carefully selected varieties of microflora, since a balanced population of Friendly Flora is essential for optimum nutrient absorption, as well as healthy immune and digestive system function. The delicate balance of microflora in our digestive system is easily upset by daily stress, digestive issues and normal aging. This balance is further disrupted by medications that affect the digestive system, including antacids or even worse, antibiotics, which can wipe out our Friendly Flora. The most common source of Probiotics is yogurt, but it generally contains low levels of only a single variety of probiotic and yogurt can present digestive issues, along with unwanted sugar and calories. Our **Friendly Flora** provides over 5 Billion CFU (Colony Forming Units) of five distinct varieties of Friendly Flora selected for both their unique stability at room temperature, as well as their remarkable ability to survive the harsh extremes of acidity, alkalinity and digestive enzymes in the digestive system. The resulting formula retains its potency to ensure all the benefits you seek. We also add Fructooligosaccharides (FOS), since no Friendly Flora formula is complete without the food required to sustain a healthy balance of beneficial Friendly Flora.

This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.
