

Balanced Calcium and Mineral Formula

CORALadvantage® is formulated to help the body achieve optimal pH balance.* The formula provides coral calcium, minerals, vitamins, and trace minerals, with 21 co-nutrients shown to increase the absorption and utilization of calcium, including lysine. Each serving contains 1,000 mg of natural marine coral from Okinawa, Japan. The marine coral sands provide a trace mineral rich form of calcium and magnesium in a biologically optimal 2:1 ratio. Bioavailable forms of nine essential minerals are added for balance, including calcium and magnesium citrates. MSM is added to improve nutrient absorption.

The collection of marine coral sands does not harm coral reefs.

Safety sealed for your protection.
Keep out of reach of children.
