Meets American Academy
of Pediatrics guidelines
for vitamin D

To ensure maximum freshness, **Baby's DHA** is closely managed from sea to store. We source the highest quality wild Norwegian Arctic cod using traditional, sustainable methods. The same day our fish are caught they are transported to a Norwegian facility for processing and purification. Baby's DHA is bottled with a touch of natural vitamin E to prevent oxidation and is tested by an FDA-registered laboratory for freshness, potency, and purity.
