

STACK FACTOR 2™ WITH TEST X180™ FOR EXTREME MUSCLE RESULTS

Stacking Factor 2 and Test X180 gives you even more of the energy, endurance, and strength you need to power through grueling workouts in the gym and get that extra boost in the bedroom.

When you work out, the Testofen® in Test X180 raises your free testosterone levels, increasing your stamina and igniting your libido so you can feel more energy and desire even after you've left the gym. Free testosterone also plays an important role in protein-synthesis, leading to enormous muscle gains.

Test X180 alone can change your life, but if you want to truly transform your body and exude confidence wherever you go, then you need to add the raw nitric oxide boosting power of Factor 2 to your fitness regimen. As soon as L-citrulline gets to work increasing your body's production of nitric oxide, your muscles get more of the oxygen and nutrients they need to work at maximum intensity. The harder you work out, the more you are able to take advantage of the testosterone boosting potential of Test X180.

When you use Factor 2 with Test X180, you get more than just increased libido, you get the energy, stamina, and sexy, sculpted muscle you need to truly look and feel confident in the gym and bedroom and to surpass your most ambitious fitness goals.

FACTOR 2™

Powerful Ingredients, Incredible Results

Have you been logging long hours in the gym and not seeing the results you want? You could be starving your muscles of the vital oxygen and nutrients they need to blast through reps and finish strong. Factor 2 boosts your body's natural production of nitric oxide, which in turn increases oxygen and nutrient delivery to your muscles so you can workout longer and with more intensity. Factor 2 contains L-citrulline, a powerful amino acid that has been shown to be 2x more effective at boosting nitric oxide than other leading nitric oxide boosters on the market. If you want to attack your workouts with unprecedented energy, power, and stamina, and start packing on pounds of lean muscle, Factor 2 is the answer.
