

SUGGESTED USE: Adults take 1 capsule 1-2 times a day or as directed by your qualified healthcare professional.

N-Acetyl Glucosamine (N-A-G) is a precursor to hyaluronic acid, which is part of the synovial fluid in joints.* N-A-G combines with mucin secreted from goblet cells to support the glycocalyx, a protective layer of glycoproteins and polysaccharides that lines the digestive tract.* N-A-G is an aminosaccharide, synthesized from glucose and the amino acid L-glutamine, that has been stabilized by complexing it to an acetyl group.

WARNING: Consult a healthcare professional before using this product if you are pregnant, nursing, under the age of 18, are taking medication or have a medical condition; if adverse reactions occur, discontinue use.

KEEP OUT OF THE REACH OF CHILDREN.
STORE IN A COOL, DRY PLACE.
