

MELATONIN

1 mg

A DIETARY SUPPLEMENT

60 Capsules

Exclusively manufactured for:

LONGEVITY  MEDICAL CLINIC™

Melatonin is a hormone produced by the brain's pineal gland to regulate natural sleep/wake cycles. Recent scientific evidence suggests that melatonin may also support healthy cells and tissues by maintaining a healthy balance of new blood vessel formation, promoting immune activity, and scavenging free radicals to positively support tissues such as breast, prostate, colon, and lung.*
