BPI SPORTS BEST BCAA™ is not your typical, run-of-the-mill, same as everyone else, outdated BCAA product. Not even close. This formula is the first to bond the three branched chain amino acids - leucine, isoleucine and valine - utilizing a proprietary process route, to form oligopeptides (a bonded chain of amino acids; for example, a peptide linked chain). The oligopeptide-based branched chain amino acids may act as a better transport vehicle, allowing for more efficient metabolism, greater bio-activity, enhanced onset time, and a generally improved BCAA model. And, the scientific minds at BPI Sports didn't stop here ... for maximum potential benefit, the oligopeptide branched chain amino acids in **BEST BCAA™** are delivered via complex bio-active Oligopeptide-Enzymatic Technology™. In addition, this unique and unrivaled product also incorporates a CLA Matrix Blend and Agmatine Sulfate. The scientific literature suggests CLA and Agmatine have properties that may support lean muscle-building programs.*†
