MAGNESIUM is an essential mineral that plays an important role in the healthy functioning of nerves and muscles. Magnesium may be a contributing factor to maintaining a healthy heart rhythm, and strong bones by helping the body to absorb calcium and potassium. Magnesium supplementation may also help in easing leg and muscle cramps.†

POTASSIUM is an electrolytic mineral that works inside the cells to assist in regulating the body's water balance. Nerve and muscle functions can suffer when the water balance in the body is off.†

This team of essential minerals may help to eliminate painful leg cramps that affect mobility and rest.†
